Java developer

Lisbon

Full Time

With Contract

Ref. 201804|001

AGORA is a software company based in Lisbon and operations in São Paulo (Brazil) and the United Kingdom. During the last 4 years we've developed a groundbreaking IoT ready software adopted by large organizations as banks, critical infrastructures and multinational organizations.

Our team is highly skilled, motivated and hard working. The team is growing and we are looking for talented people.

CHALLENGE AND RESPONSIBILITY

We are looking to add a Java Developer to our product development team based in Lisbon. The ideal candidate will not only be capable of the development activities, but also be able to work in a highly-dynamic team, bring ideas to the table and be able to interact with co-workers, team leader, designer and product manager.

Requirements:

- Degree in Computer Science Masters or equivalent
- 2 year experience developing code components in Java, JavaScript, HTML5 and CSS3
- Development components for Web applications
- Database skills including: schema design and optimized SQL statement development
- Technical application design skills
- Be self-motivated and know when to seek guidance
- Ability to work independently and as part of a team
- "Can-do" attitude and highly collaborative style with ability to gather consensus and take action
- Fluent in English, spoken and written
- Availability to travel

AGORA

Experience with is a plus:

- GWT development kit
- Experience working as a member of a small agile software development team, e.g. participating in planning sessions and interpreting user stories.

TOP REASONS TO WORK WITH US:

- Be involved in conquering international markets
- Grow with the company / startup environment
- Competitive salary
- Be eligible to get extra training
- Contribute to people security and safety
- Opportunity to travel
